A Smart All-in-One Touchscreen to
Enliven Your Office or Classroom

AQUOS BOARD®

4K
3840 × 2160 Pixels

Looking for a smart, interactive display for your office or classroom? Meet the all-in-one Sharp PNC861H, PNC751H and PNCE701H AQUOS BOARD interactive display systems that make all your visual communications more lively and productive. Available in three sizes—86" Class (85 9/16" diagonal) PNC861H, 75" Class (74 1/2" diagonal) PNC751H and 70" Class (69 1/2" diagonal) PNCE701H, respectively—this series opens up an affordable path to pristine 4K Ultra HD resolution. A pre-installed launcher makes it quick and easy to start up and use the interactive whiteboard. Your lecture, presentation, or lesson can now be more creative and involving.

Stress-Free Operation

IWB Launcher

Thanks to the built-in controller, it's easy to operate this all-in-one interactive whiteboard. You don't even need to hook up a dedicated PC. As long as the main unit's power is on, you can run the launcher. Then, with a single tap you can access the function you need.

Home screen of PNC861H and PNC751H models

Home screen of PNCE701H model

Built-in Whiteboard

Switch to the whiteboard function to use the LCD monitor as a temporary writing board—no PC required. Even for first-time users, this simple write-and-erase function is a breeze to operate.

Display, Write, and Share Information

Even without a PC, you can use overlay mode to write onscreen annotations directly onto photos, videos and documents. This function is especially handy when you need to share meeting notes with participants or others.

Note: The overlay function works differently on the PNCE701H and the PNC861H/PNC751H models.

Flexible and Expandable

OPS-Compliant Slot

A slot on the PNC861H, PNC751H and PNCE701H interactive displays bring compatibility with OPS (Open Pluggable Specification) controller modules. This means you can set-up the monitor to run without having to connect it to a client PC. Without the extra bulk of a client PC, you've got more freedom when it comes to installation set-ups.

Slot on 86-inch model

Front-mounted Speakers

Two speakers are mounted low on the front of the LCD monitor. These speakers project sound more directly than rear-mounted speakers, giving you clearer sound for your lessons and meetings.

One-Touch Buttons

The PNC861H, PNC751H and PNCE701H interactive displays are designed with your convenience in mind. Buttons for frequently used functions such as power on/off, input switching, volume up/down and freeze are neatly arranged on the front of the frame.

a Freeze Button

A press of this button lets you temporarily freeze or unfreeze the screen. While the display continues to show a paused onscreen image, you can stop and explain your point.

b Input Button

At the touch of a button, a list of inputs appears on-screen. You can then instantly select the input terminal you want.

Front Terminals

These make it easy to access teaching materials or other content stored on sources connected via HDMI™ and USB.

(PNC861H/PNC751H)

Simultaneous Writing

The LCD panel recognizes up-to 20* touch points. Up-to four people at a time—even young students—can use a finger or touch pen to add their input when inspiration strikes. Meetings, lessons and brainstorming sessions will come alive.

* PNCE701H model has 10 touch points.

Built-in Controller

The PNC861H, PNC751H and PNCE701H interactive displays feature an integrated controller that comes with 8 GB of internal memory. The PNCE701H model also supports external storage via SD card. It's easy to play back your photos and videos on one of these monitors. There's no need for a PC to run the main application.

Get Your Message Across

Interactive Touchscreen

The PNC861H, PNC751H and PNCE701H interactive displays deliver innovation to the world of business and education. They enhance your visual communications by transforming presentations and lessons. In the classroom, visual and web-based content will help to keep students more focused and engaged.

Wireless Connectivity

These LCD monitors have built-in wireless functionality. Simply touch the screen and your smartphone, tablet, or computers* will immediately download an app that lets it send images wirelessly to the monitor. No need for tangled wires or conversion adapters.

* Compatible with Windows® and Built-in SoC operating systems.
Note: Requires wireless LAN access points to connect LCD monitor and devices.

4K Ultra HD Quality

The PNC861H, PNC751H and PNCE701H interactive displays support 4K Ultra HD and capture the fine textures of still and video images, while also reproducing the precise details of small text and complex graphics. It's an ideal large-scale monitor for professional use in a range of environments, from engineering and architecture to academia and creative fields.

User-Friendly SHARP Pen Software

The easy-to-launch SHARP Pen Software interface has a menu with smartly arranged icons. These give you easy access to pen settings and other useful functions. Further handy functions* include access to cloud storage, an e-mail address book, sticky notes and bookmarks.

* Availability varies by country/region. For details, please consult your local authorized Sharp dealer or representative.

Note: Requires a separate Windows PC.

Built-in Media Player

These LCD monitors can play 4K Ultra HD photo slideshows and videos without the need for a PC or set-top box.

16-Hour Daily Operation

The PNC861H, PNC751H and PNCE701H interactive displays can be used continuously for up-to 16 hours per day, providing reliable performance in the schoolroom or office.

<System Requirements>	
Connected Equipment	
Hardware	PC/AT compatible machine with USB 2.0 port (CD-ROM drive required for installation)
OS	Windows 8.1 (32-bit/64-bit), Windows 10 (32-bit/64-bit) macOS® v10.13, macOS v10.14, Google Chrome™ OS v74 or later
Supplied Software (Windows)	
CPU	Intel® Core™ i5-6360U or higher Intel Core i7-6650U or higher recommended
Memory	4 GB or more
Hard disk	5 GB or more free space (additional space required for saving data)
To use the touch panel, connect the bundled USB cable to the computer. The touch panel operates with the standard driver of each OS. On the Mac®, operation is only possible in single-touch mode.
